Alberta Netcare Portal Enhancement

1. COVID-19 Results to Display in Netcare's Microbiology Folder

Description:	All COVID-19 results are now filing to one Netcare folder; results previously filed to the Chemistry folder are now in the Microbiology folder.
Details	Most of the COVID-19 results correctly mapped to Netcare's Microbiology folder, however, some were mapped to Netcare's Chemistry folder. COVID-19 results from all data sources are now coded to file to the same Netcare folder: Microbiology.

2. CC OP Letter Procedure Date to Match the CDV Tree Date

Description:	Netcare CDV Tree Procedure Date now matches the Connect Care Outpatient Letter "Date of Visit" in the letter body.
Details	Connect Care Outpatient Letters (reports) were displaying the report's submission date in Netcare's CDV Tree. Now the CDV Tree Procedure Date matches the patient's clinical encounter date.
