

# Alberta Netcare Applications and Initiatives

**Physician**

**Nurse  
Practitioner**

**Pharmacist**

**Specialist**

**Chiropractor**

**Optometrist**

**Dentist**

Select your facility type to learn more about the specific  
Alberta Netcare initiatives that apply to you.

# Pharmacy

---

## **View and Share Patient Health Information in [Alberta Netcare Portal \(ANP\)](#)**

View and share patient health information including laboratory results, diagnostic imaging (DI) reports, operative notes, hospital events, and medication histories are accessible within individual patient records.

---

## **Manage Vaccination Appointments with the [Alberta Vaccine Booking System \(AVBS\)](#)**

Share information on paneled patients to provide continuity and to identify yourself as the primary provider in ANP. CPAR participating providers receive timely eNotifications directly into their integrated EMR concerning patient events that occur at Alberta Health Services (AHS) facilities.

---

## **Manage User Access Online with [AHS Identity & Access Management \(IAM\)](#)**

Create, modify or remove your staff access in real time.

---

## **Exchange Information between ANP and your Electronic Medical Record (EMR) in real time with [Real Time Integration \(RTI\)](#)**

Exchange information such as medications, allergies, immunizations, and patient demographics in real time between an EMR or pharmacy vendor system and Alberta Netcare.

# Physician Office

---

## **View and Share Patient Health Information in [Alberta Netcare Portal \(ANP\)](#)**

View and share patient health information including laboratory results, diagnostic imaging (DI) reports, operative notes, hospital events, and medication histories are accessible within individual patient records.

---

## **Share Information from your Electronic Medical Record (EMR) with [Community Information Integration \(CII\)](#) and the [Immunization Direct Submission Mechanism \(IDSM\)](#)**

Securely share comprehensive patient information such as encounter summaries, consultation reports, vital signs, current medications, allergies, and immunization records from your EMR directly to Alberta Netcare.

---

## **Share Patient Panels for Continuity and Receive eNotifications in your EMR with the [Central Patient Attachment Registry \(CPAR\)](#)**

Share information on paneled patients to provide continuity and to identify yourself as the primary provider in ANP. CPAR participating providers receive timely eNotifications directly into their integrated EMR concerning patient events that occur at Alberta Health Services (AHS) facilities.

---

## **Manage User Access Online with [AHS Identity & Access Management \(IAM\)](#)**

Create, modify or remove your staff access in real time.

---

## **Exchange Information between ANP and your Electronic Medical Record (EMR) in real time with [Real Time Integration \(RTI\)](#)**

Exchange information such as medications, allergies, immunizations, and patient demographics in real time between an EMR or pharmacy vendor system and Alberta Netcare.

# Nurse Practice

## **View and Share Patient Health Information in [Alberta Netcare Portal \(ANP\)](#)**

View and share patient health information including laboratory results, diagnostic imaging (DI) reports, operative notes, hospital events, and medication histories are accessible within individual patient records.

---

## **Share Information from your Electronic Medical Record (EMR) with [Community Information Integration \(CII\)](#) and the [Immunization Direct Submission Mechanism \(IDSM\)](#)**

Securely share comprehensive patient information such as encounter summaries, consultation reports, vital signs, current medications, allergies, and immunization records from your EMR directly to Alberta Netcare.

---

## **Share Patient Panels for Continuity and Receive eNotifications in your EMR with the [Central Patient Attachment Registry \(CPAR\)](#)**
