

eReferral

by the numbers

30%

HIP AND KNEE

Nearly one third of eReferrals are made for hip and knee replacement surgery. These referrals are most often made by family physicians.

124

eReferrals have been submitted with the standard hip & knee form attached

22%

Nearly 1/4 of referrals to hip & knee are sent by physicians; most are sent on behalf of a physician, by a referral coordinator or a medical office assistant.

3852

TOTAL eREFERRALS

From July 2014 until February 2016, eReferral has been used to send and receive 3852 referrals to hip and knee replacement surgery, breast cancer and lung cancer. On average, monthly referral numbers have increased by 100 referrals every 9 months.

318

JANUARY 2016

The beginning of 2016 saw twice as many eReferrals as January 2015. Because most users quickly adopt eReferral after just one use, this trend is expected to continue.

62%

BREAST CANCER

The bulk of eReferrals are sent for breast cancer care. Most of these are created by breast health clinics and breast surgery offices.

32

A small number of advice requests have been made, a feature that will be expanded to other specialties as early as June 2016.

30%

of all eReferrals are sent to Tom Baker Cancer Centre
